

**Techexperts Srl** was established in Oct 2003. Our main goal is to provide our customers with integrated consulting services in the electronic and information technology fields.

Techexperts Srl has an wide-range offer that is covering sectors from industrial automation to consumer electronics, from scientific research to multimedia, from advanced management systems to Internet and mobile applications. Our team comprises engineers and professionals having heterogeneous but complementary know-how, strong due to various backgrounds experienced for over 10 years in relevant companies.

The team professionalism and creativity are constantly developed in various seminar and courses. These features, as well as our dialogue capability with customers from different areas, let us quickly understand their needs and give them customized solutions.

## TECH EXPERTS OFFERING

Designing, prototyping, engineering, industrial and small series production of:

### Devices for industrial automation

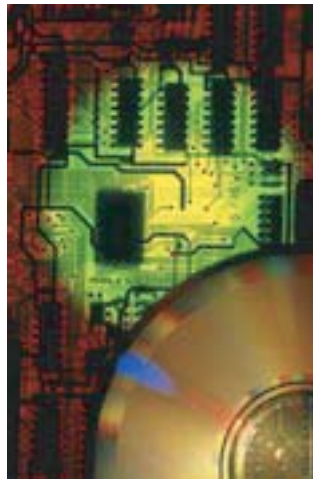

Process measurement and control, engine control, user interfaces, RFID.

### Embedded systems

From 4 to 64 bit, the intelligence that makes your products smart.

### Biomedical

Thanks to the experience we developed in this field we can project and design biomedical devices.

Consultancy and services for:

We create SW and HW able to connect the different parts of your production and information processes.

### Software development

From Visual.NET to Java, we develop applications for PCs and servers under main Oses, for hand-held computers and embedded platforms.

### Web appliances

As MySQL certified partner we create client-server distributed solutions.

### Data security

Consultancy for the management of information security according to the current law regulations.

## TECH EXPERTS CUSTOMERS

**MR&D Institute** devices for home automation

**Alenia Aerospazio Spa** radar data input analysis system

**Galileo Avionica Spa** spherical sensors network (connected via optic fiber) acquiring in real-time the energetic density of variable electromagnetic fields at a given frequency

**Arthur D. Little Spa** a decision support system aimed at textile company marketing and strategic roadmap

**Trimprobe Spa** software and advising project development for the TRIMprob

**Savio Spa** embedded production control system in a very noisy plant environment

**Setel Spa** custom control systems for broadcasting devices

**IPM Group Spa** speech recognition Auris boards and PC-architected PBXs

**Università di Roma Tor Vergata** electro-medical devices development

These our main customers, among many small-to-medium companies
